

OUR CORE VALUES ARE OUR DNA

OUR CORE VALUES ARE THE DEEPLY INGRAINED PRINCIPLES THAT GUIDE ALL OF OUR COMPANY'S ACTION, SERVE AS OUR CULTURAL CORNERSTONES.

They are inherent and sacrosanct and will never be compromised, either for convenience or economic gain. They are the source of Aventus Ai's distinctiveness and will be maintained at all costs.

COLLABORATION

At Aventus Ai, we will always endeavor to continuously develop.

At the heart of continuous development there is a need for internal and external collaboration in order to continually achieve the best and most efficient solutions.

Only through meaningful collaboration can we fully understand a problem and therefore marshal appropriate resources in order to define, analyse, remediate, and implement a plan for prevention of reoccurrence.

Collaboration drives true innovation and progress.

PROFESSIONALISM

The key to quality, efficiency and integrity is professionalism. We are qualified, skilled and committed.

We all personally commit to continuous improvement and professional growth and take pride in producing work of the highest quality and delivering exceptional service to our internal and external customers.

We exhibit pride in professional appearance, language and behaviour, and we assume responsibility for delivering project deliverables on time and always aspire toward exceeding client expectations.

We maintain composure in challenging situations and will always respect, appreciate and positively influence those around us.

INNOVATION

Innovation gives us competitive advantage. We always strive to innovate through collaboration with our clients, internal SME's and universities. However, we will never be restricted to an internal product development pipeline only.

We will always look to expand our ecosystem and source individual leaders, often niche players at the leading edge, develop a strategic partnership and intelligently apply their expertise to best effect.

As a company we will always remain agile and responsive to our internal and external customers and satisfy industry needs. We encourage our people to challenge established practices and achieve continuous improvement.

We are committed to delivering thorough and sound solutions to every challenge.

MENTORING

With a recognised gap and expertise and knowledge associated with both an ageing workforce and young graduate engineers and scientists, essential to the lifeblood of the company, we advocate and foster mentoring and learning both internally and externally.

We operate in a consultative capacity, working closely with the customer personnel to train and educate on any new processes and/or technologies in order to facilitate and support their management of change program.

INTEGRITY

Integrity is our cornerstone and character are as important as ability. We will always be open, honest and transparent.

We are aware of the economic and financial pressures that operators face, and discussion starts around understanding the problems and challenges.

We will always conduct a thorough gap analysis and deliver the best cost benefit scenario.

We conduct risk assessments and conduct CCP workshops pre-milestone delivery, throughout the project life cycle, so conducting go/no-go discussions early to mitigate risk to both Aventus Ai and our clients.

If need be, we will stop a project to avoid wastage and investigate all violations and complaints and always take appropriate action.
